Product Description

Commercial 30 X-Series Features

Increased Power: The Commercial 30 X-Series is equipped with a single-cylinder commercial engine. The increased displacement of the powerful commercial engine gives it more torque than competing engines to quickly power through the toughest, thickest grass.

Upgraded Transmission: The heavy-duty wet clutch transmission and self-tensioning belt drive are designed for minimum maintenance and maximum reliability in the most demanding commercial applications. The Commercial 30 X-Series also includes a parking brake.

Increased Wheel Torque: The upgraded heavy-duty transmission takes advantage of the engine's additional power. It delivers increased wheel torque to power up hills, with easier tracking on side hills. The positive drive design couples both drive wheels for maximum traction in all conditions.

Maximum Maneuverability: Pivoting front wheels make turning and maneuvering easy without lifting the front of the mower. Increased cut quality and reduced operator fatigue are two great results. (Coming Spring 2025)

Fuel Capacity: 1 gallon

Speed: 3.8 mph

Cutting Height Range: 1.5" - 5.0"

Coverage In Acres: < 1

Acres Per Hour: 0.92
